ROUTINE VS. MEDICAL EYE EXAM?

What You Need To Know Before Your Exam

- **Know the difference between Routine and Medical eye exams to maximize your insurance benefit.**
- **Please clarify the type of exam you need when scheduling to avoid the hassle and confusion of complicated insurance claims.**
- **A Routine Eye Exam**
 - Assesses the basic general health of your eyes and may include dilation
 - Provides a prescription for new glasses or contact lenses (please identify if contact lens prescription is needed)
 - No medical eye conditions will be evaluated at this exam
 - Filed as a routine eye exam with your insurance or vision service plan
- **A Medical Eye Exam**
 - Thorough dilated exam to address medical eye conditions
 - Examples: Cataract, Glaucoma, Diabetic Retinopathy, Macular Degeneration
 - This type of exam is a detailed medical exam to determine, assess, and recommend any treatment necessary and may include additional testing
 - Filed to your insurance under your medical coverage
